

TOPAKUSTIK® type 30/2 M - data sheet

TOPAKUSTIK® type 30/2 - the filigree profile

This very filigree profile convinces with its fine groove and its good sound absorbing characteristics in spite of its perforation of only 3.5%. Very adequate for offices, living rooms and restaurants

Planks

Thanks to the precise tongue and groove connection, planks result in an attractive surface with a joint-free appearance, because the connecting joint matches the dimension of the grooves. The planks permit simple and flexible assembly. They can be installed by stapling to a timber batten or clamping to a T-bar with TOPAKUSTIK® clips.
